

The Peloton Bike for Commercial Facilities

Bring the immersive cardio experience that's like no other to your exercisers with the Peloton Bike, equipped with features for use in commercial fitness settings.

Our commercial subscription opens the door for unlimited riders to experience the popular expert-led classes for free without their own Peloton subscription.

Riders can access live or on-demand classes that offer a variety of music genres, ability levels, class types and lengths, or step off the Bike and try yoga, strength training or stretching. With options like Just Ride, Scenic Rides and the new Peloton Lanebreak™, a gamified workout experience, there's simply more to do on or off a Peloton Bike.

The Peloton Bike transports each rider to the center of a studio class with a 21.5" HD touchscreen, compatible with standard or Bluetooth® headphones. The belt drive and magnetic resistance keep it whisper-quiet while in use, and after 3 minutes of inactivity, the rider's account will be logged out.

Our 3-year commercial warranty covers your investment for 2 years beyond Peloton's standard consumer warranty.

Peloton Bikes for commercial settings come with convenient dual-sided pedals (not shown here) for athletic shoes or SPD® compatible bike shoes.

PRICING: August 2023 (subject to change)

PELTON BIKE: \$2,995.00 (MSRP)

SUBSCRIPTION: 1 YEAR \$528.00

SUBSCRIPTION: 3 YEARS \$1,584.00

Benefits

Our commercial software allows Peloton Members and non-Members to have their own profile and enjoy unlimited rides.

Our commercial warranty covers your investment for two years beyond Peloton's consumer warranty.

Our convenient design accommodates athletic shoes or SPD-compatible bike shoes.

Included in all orders, these dumbbells enable a full-body workout.

Protect your commercial flooring and conceal the power cord

We've provided highly-rated service to commercial customers for over 40 years.

Network Requirements

The Peloton Bike will work on a wireless connection, but a wired connection is recommended. If using a wireless connection, place the Bike as close as possible to a WiFi access point. The touchscreen supports both 2.4Ghz and 5Ghz frequencies over WiFi. Where proximity allows, we recommend utilizing the less-congested 5Ghz WiFi band.

NETWORK PARAMETER	Recommended Requirements	Intermediate Requirements	Minimum Requirements
PHYSICAL CONNECTION	Wired connection	WiFi with WPA2 5Ghz band	WiFi with WPA2 2.4Ghz band
DOWNLOAD SPEED UPLOAD SPEED	>10 Mbit/s >1 Mbit/s	>10 Mbit/s >1 Mbit/s	>5 Mbit/s >512 Kbit/s
FIREWALL	All outbound traffic is allowed No Captive Portal No URL Filtering Direct Internet Access (No Proxy)		
IP ADDRESS ASSIGNMENT	Static DHCP	Dynamic DHCP	Dynamic DHCP
